

# Data Analyst, Intern

Candidate must be residing in Tokyo Japan

Our portfolio company is an innovative and disruptive startup in the HR space.

## **Title: Data Analyst, Intern**

What We're Looking For:

You're a data geek with killer quantitative skills, and you're looking to apply those skills and excited about working closely with data scientists, product managers, engineers, and senior leadership to provide insights and analyses that drive product strategy, innovation, and adoption of our products. Fast-paced environments, details, and a deluge of data all sound like your cup of tea.

What You'll Do

You'll acquire, clean, and structure data from multiple sources, including Google Analytics, AdWords, and internal databases, and analyze data to discover and interpret trends, patterns, and relationships. You'll help us monitor search marketing performance and identify opportunities. Working across departments, you'll help us ensure data quality and present data in a way that makes it easy to communicate among different groups. You'll also help the team with ad hoc data requests – and you'll learn something new every day.

Skills, Accomplishments, & Interests You Should Have

- Working toward a Bachelor's degree in Mathematics, Statistics, Computer Science, Engineering, or other quantitative field from a top educational institution
- Highly analytical and quantitative, with strong attention to detail
- Self-starter with excellent written and verbal communication as well as interpersonal skills
- Ability to thrive in a fast-paced, ambiguous, interruptive environment
- Ability to work independently as well as work collaboratively toward a common goal

Nice To Haves

- Experience with Google Analytics and SQL
- Advanced computer and modeling skills, with high proficiency in Excel modeling, data mining, and scenario analysis
- Extensive LOTR or Star Wars knowledge
